TALK ON CHEMICALS OF EVERYDAY USE

Mrs. Rita Chandel, Assistant Professor, Department of Chemistry – delivered a talk on the topic “Chemicals of Everyday Use” to the students of B.Sc 2ND. Almost 150 students attended the seminar. The contents were effectively presented with the help of power point presentation. The general chemicals, their methods of

preparation and uses in our daily life were discussed in detail.

The topic was of general interest and therefore the students actively participated in the lecture. They asked many questions about the chemicals used in day to day activities. All the queries were explained by Mrs. Rita Chandel. In the end the students were satisfied and they also enjoyed the lecture.
