

CHEMICAL SOCIETY FUNCTION

Date-21 November,2025

Venue-Conference Hall

Time-11:00am

REPORT

The Department of chemistry organized an inspiring function titled “**Molecules to Miracles**”, designed to highlight the transformative role of chemistry in modern society and to encourage students to explore its diverse applications. The primary objective of the event was to promote scientific awareness, spark curiosity, and deepen understanding of how chemistry influences everyday life. Our worthy principal **Prof. Bharti Bhagra** graced the event as chief guest. Students participated in poster making and power point presentation competitions highlighting the topics “**Polymer Chemistry, Green Chemistry and Chemistry in Everyday Life**”. A documentary was also presented on the theme of the event. The main goal of these

topics was to demonstrate that chemistry isn't just a theory but science underlying all daily processes. At the end, chief guest for the day gave her final remarks in the speech and after that Vice-President of the Chemical Society concluded the session with vote of thanks.
