

DEPARTMENT OF ZOOLOGY

FLIPPED CLASSROOM ACTIVITIES CONDUCTED DURING THE SESSION 2024-2025

1. Poster presentations:

students presented posters with peers rotating to critique (subject expert) and discussed pros and cons of the topic chosen to develop scientific temperament.

2. Hands on training for Analytical & Evaluative Discussions:

under the skill subject apiculture, a hands on training was organised for the students where they gained knowledge about the honey bee products such as honey, bee wax and various parameters such as pH, colour moisture to check the purity of honey and then did lab experiments on their own with the honey samples collected from different regions of Himachal Pradesh (Mandi and Shimla)

3. Active learning in class through Student presentations/student teaching :

Students prepared power point presentation on the topic assigned to promote peer learning and check their level of understanding about the topic given where the teacher played an active role as an observer to give a valuable feedback.
